

You should not implement any proposal to lessen the protections which are currently provided by Indiana's telephone privacy laws. This law has provided the quiet time to help with my child's homework and have quality family time. My phone rings all day at the office and I don't need unsolicited calls at my home. If the solicitors wish to pay my phone bill and dictate to me what calls I should receive, let them pay the bill. Until then - I am truly appreciating the peace and quiet which has been beneficial to my home and family. Until this law was in effect, I had to pay money for Privacy Manager through Ameritech. I should not have to pay additional money to ensure my privacy at home. If this law does not stand, I'll have to go back to screening my calls. If I'm interested in a product, I'll call them. Thank you!
